Springer Open Choice uptake affects 2011 journal pricing

Springer has analyzed the uptake of its open access option Open Choice for articles published in 2009 and is pleased to share its impact on 2011 pricing.

Springer Open Choice allows authors to publish their article with open access in exchange for payment of a fee, for the majority of its journals. The articles are then immediately freely available and the copyright remains with the author, and articles are published under the Creative Commons Attribution Non-Commercial License. These articles can be self-archived with immediate access.

Acquisition of BioMed Central in 2008

“Springer is now the world’s largest open access publisher”
Peter Suber in October 2008
Open Access bei Springer  - Bettina Goerner

**SpringerOpen**

- New suite of open access journals which will cover all disciplines
- All articles are fully and immediately open access
- No subscriptions, article processing fees instead
  - Paid by the author (via research grant, library, institutional OA fund, …)
  - Paid by a member institution
  - Waivers in cases of economic hardship
  - Invitation waivers for EICs
346 members in 39 countries!

Springer and Helmholtz Association sign agreement for open access membership

Cooperation makes open access publishing easier for scientists

Following the launch of SpringerOpen, the Helmholtz Association has signed a new agreement for an open access membership. This agreement covers article processing charges for authors from the participating Helmholtz research centres for articles published in SpringerOpen and BioMed Central journals.

SpringerOpen journals are peer-reviewed open access journals in emerging and interdisciplinary fields that complement both the established Springer journal portfolio and BioMed Central’s growing list of over 200 life science and biomedicine journal titles. SpringerOpen journals are e-only and publish articles under the Creative Commons Attribution license. According to this license, Springer will not reserve any exclusive commercial rights.
Open access for authors in all disciplines

SpringerOpen makes it easier than ever for authors to comply with open access mandates, retain copyright and benefit from Springer's trusted brand.

SpringerOpen is a forthcoming series of open access journals. The first titles will be open to receive submissions soon and start publishing in early 2011.

Featured journal

Journal of Mathematics in Industry
The Journal of Mathematics in Industry is a high-quality journal that brings together research on developments in mathematics for industrial applications, including both methods and the computational challenges they entail.

Welcome SpringerOpen authors

- Authors retain copyright under the
SpringerOpen

Giving authors in all areas of science the opportunity to publish open access

- Easy way to fully comply with open access mandates
- Author retains copyright
- Open access with Springer quality and speed in all areas of science

OPEN ACCESS

A comprehensive review of hip labral tears

Megan M. Groh · Joseph Herrera

Published online: 7 April 2009
© The Author(s) 2009. This article is published with open access at Springerlink.com

Abstract The hip labrum has many functions, including shock absorption, joint lubrication, pressure distribution, and aiding in stability, with damage to the labrum associated with osteoarthritis. The etiology of labral tears includes trauma, femoroacetabular impingement (FAI), capsular laxity/hip DDH. Developmental DDH. MRA. Magnetic resonance imaging. MRA. Magnetic resonance imaging. MRI. Magnetic resonance imaging. PT. Physical therapy.
